CR26BAAE

Figure 1. The structure of the plate model in two principal plate circuits, West Gondwana (1) and East Gondwana (2), that share the relation of Antarctica to Africa. The closure of each circuit is indicated in red. The motion of Africa with respect to a global reference frame is defined in the table at the head of this page. In all the subsequent tables, the motion of the fragments is presented with respect to a fixed Africa.

Plate model CR26AAAE (Africa fixed)

516	154.940	24.766	-25.943	64.741	
516	165.000	19.058	-24.757	69.002	
516	555.000	19.058	-24.757	69.002	CR26AAAE

This plate circuit closes between the (conjectural) southern-and-eastern margin of the Malvinas Plateau (Hoorn, 516) and the Weddell Sea mid-ocean ridge (123). The objective has been to create a Weddell Sea mid-ocean ridge system that develops symmetrically about the ridge (123) initiated at 142.3 Ma. The elements of the plate circuit have been adjusted so as to minimise concertina-like growth of the ocean between Antarctica and 123. The relative movement of SAM and ANT now (CR26AAE) also reproduce the smooth arcs of the 'Antarctica-South America corridor' recorded in the Weddell Sea, after about 100 Ma.

Other fragments that make up the model in the area of the Bouvet triple junction are:

505 Maurice Ewing Bank versus Africa

448	178.000	33.684	-1.865	0.348	
448	179.000	16.685	1.882	0.504	
448	230.000	16.685	1.882	0.504	
448	300.000	3.704	27.730	0.263	CR26AAAE

Fragments 448 (Southern Kalahari), 449 (Zimbabwe) and 447 (North Mozambique) are listed under Plate Circuit 1.

This plate circuit closes between India and Madagascar. The movements of Madagascar against Africa and of India against Antarctica have been adjusted to minimise/eliminate relative movement between Madagascar and India before 89 Ma. The movement of India against Antarctica has been refined to ensure steady strike-slip movement of (Greater)India along (a) the long transform off Western Australia, 142.3 to 100.5 Ma and (b) the Davie Fracture Zone 134.7 to 89 Ma, i.e. while Madagascar is still fully attached to India.

200 Australia versus Africa

200	33.430	-15.002	-126.879	19.523	
200	41.000	-15.523	-125.401	22.265	
200	42.860	-15.321	-125.286	23.277	
200	43.960	-14.746	-124.796	23.556	
200	51.000	-16.414	-121.175	24.217	
200	67.000	-15.686	-114.756	25.647	
200	70.900	-16.076	-111.725	26.224	
200	80.000	-14.809	-103.277	27.495	

200	83.640	-13.901	-102.393	27.903	
200	100.500	-10.322	-94.091	34.988	
200	113.200	-14.412	-83.324	37.969	
200	121.400	-20.709	-74.865	40.208	
200	124.700	-25.181	-69.729	41.194	
200	127.500	-27.036	-66.709	42.258	
200	130.680	-26.712	-65.589	43.547	
200	134.700	-26.172	-65.054	44.739	
200	137.700	-25.688	-64.579	45.864	
200	142.300	-25.139	-64.049	47.206	
200	154.940	-23.753	-62.736	50.961	
200	184.200	-24.500	-63.045	55.100	CR26AAAE

Australia does not form part of either plate circuit. Rotations are included for completeness. The Australia-Antarctica poles are taken largely from published work supplemented with a closer fit to Antarctica in conformity with the principles adopted throughout our Gondwana reassembly.

301 Sri Lanka versus Africa

301	33.430	-13.342	-125.663	19.395	
301	41.000	-14.843	-131.474	24.759

123	121.400	36.330	-35.267	37.551
123	124.700	30.444	-31.395	38.853
123	127.500	27.534	-29.904	40.170
123	127.520	27.530	-29.908	40.179
123	130.680	27.405	-29.889	41.618
123	134.700	27.282	-30.665	42.720
123	137.700	29.283	-31.472	43.876
123	140.490	27.960	-31.206	44.674
123	142.300	27.817	-31.287	45.207
123	147.000	27.308	-32.545	46.372
123	154.940	26.907	-33.914	48.732
123	165.000	26.419	-34.510	49.767
123	184.200	24.505	-36.947	50.966

Ten minor, short-lived ridges:

1 - MOR between S of Rio de la Plata and Southern Kalahari

555	83.640	90.000	0.000	0.000
555	113.200	7.120	-11.020	11.700
555	121.400	0.481	-5.535	15.499
555	124.700	-1.968	-3.525	17.718
555	127.400	-2.817	-2.828	18.656
555	130.680	-4.078	-1.788	20.264
555	142.300	-6.709	0.396	24.773

2 - MOR between Malvinas Plateau and Maurice Ewing Bank

566	22.000	61.850	-40.740	8.350
566	38.000	62.892	-36.920	15.088
566	43.960	63.093	-36.100	18.086
566	48.000	63.219	-35.898	19.084
566	53.000	63.435	-35.546	21.082
566	67.000	63.727	-35.060	24.569
566	71.900	63.899	-34.768	27.217
566	83.640	61.603	-35.014	33.403
566	100.500	58.858	-37.471	44.325
566	113.200	54.636	-35.264	50.160
566	121.400	50.117	-33.235	53.000
566	124.700	48.214	-32.565	54.325
566	130.680	44.928	-31.934	56.497
566	142.300	38.409	-29.361	59.354
566	155.000	31.938	-27.438	61.404
566	165.000	29.513	-26.874	62.977

3 - MOR between Maurice Ewing Bank and Antarctica

592	113.200	90.000	0.000	0.000
592	121.400	-17.780	-0.490	6.200
592	130.680	-10.700	-2.676	11.591
592	142.300	-10.533	-6.884	15.165

4 - MOR between Maurice Ewing Bank and Limpopia

591	100.500	90.000	0.000	0.000
591	113.200	54.870	-41.590	3.600
591	121.400	53.887	-51.854	5.329
591	130.680	48.781	-46.830	7.861
591	142.300	30.275	-27.317	9.829
591	555.000	30.275	-27.317	9.829

5 - MOR between Maurice Ewing Bank and Natal Valley

563	83.640	90.000	0.000	0.000
563	100.500	45.270	-30.560	5.750
563	113.200	45.270	-30.560	8.950
